

Get the latest information on Integrated Mosquito Management.

The Michigan Mosquito Control Association will be sponsoring a full day training course for certified pesticide applicators in mosquito pest management. This course has received 4 recertification credits from the Michigan Department of Agriculture. If you would like to get all of your required recertification credits for category 7F (Mosquito Pest Management) in one day – this is the course for you.

This course will involve 4 hours of lectures given by instructors from the MMCA and two hours of hands-on training dealing with pesticide safety, community mosquito abatement treatment techniques, mosquito surveillance, selection and calibration of mosquito control equipment and much more. MDA Pesticide Regulatory Staff will be providing pointers to applicators on how to avoid being in violation of law when applying pesticides for mosquito control. Check out our website at www.mimosq.org for agenda and program updates.

This is one training course that you don't want to miss. If you would like to take advantage of this opportunity, send in the enclosed registration with payment or call/email Tom Wilmot (see contact information below). Seating is limited and guaranteed seating will be on a first-come basis.
